Positivity

Regulation

Ruby's Fund can provide expert and specialist support for children who have sensory processing differences and the professionals who support them.

Our trained staff will use their knowledge, skills and resources to work with children and staff, to support sensory differences:

Children

We run sensory outreach visits in agreement with settings, providing person-centred support to children who have sensory needs identified within their SEN support or EHC plan.

Professionals

We have created a 90 minute online training package for staff who are working with children in understanding and supporting sensory processing differences.

We will provide a sustainable approach to support through provision of a leave behind pack and ongoing support.

'It was fantastic and can we do it again?'

"Three days of supporting children, developing staff confidence and competence. Thank you isn't enough"

Our sensory support and costs:

Offer 1: A day visit from our sensory bus - £280

For children age 3–11

2 dedicated Ruby's Fund team members
